

CURRICULUM VITAE

Joseph M. Casto, Ph.D.

School of Biological Sciences, Campus Box 4120, Illinois State University, Normal, IL 61790-4120
Telephone: (309) 438-3090 Facsimile: (309) 438-3722 Email: jmcasto@ilstu.edu

Professional Experience

Associate Professor of Behavioral Biology, School of Biological Sciences, Illinois State University Normal, IL, 2015 - present.

Assistant Professor of Behavioral Biology, School of Biological Sciences, Illinois State University Normal, IL, 2009 - 2015.

Assistant Director, Research Ethics and Compliance, Illinois State University, Normal, IL, 2006 - 2009.

Management Consultant, Central Illinois Neuroscience Foundation, Bloomington, IL, 2006 - 2007.

Executive Director, Central Illinois Neuroscience Foundation, Bloomington, IL, 2004 - 2006.

Director of Research and Education, Central Illinois Neuroscience Foundation, Bloomington, IL, 2003 - 2006.

Adjunct Assistant Professor of Behavioral Biology, School of Biological Sciences, Illinois State University, Normal, IL, 2003 - 2009.

Research Associate, Department of Biology, Indiana University, Bloomington, IN, 1997 - 2001.

Education and Training

Postdoctoral Fellow. Indiana University, Bloomington, IN, 2001 - 2003.

Ph.D. Johns Hopkins University, Baltimore, MD, 2001. Dissertation: Development and hormonal regulation of sex differences in the song system of European starlings (*Sturnus vulgaris*).

M.S. Villanova University, Villanova, PA, 1991. Thesis: Effects of prenatal flutamide exposure on juvenile play, saccharin preference, and male sexual behavior in rats.

B.A. College of the Holy Cross, Worcester, MA, 1987.

Grants, Fellowships, Awards and Honors

Federal Grants and Initiatives

National Science Foundation, IOS preliminary proposal (01/19/2017): Do 5-beta reduced steroids alter embryonic development in oviparous vertebrates?. (PI: Casto, in review).

National Science Foundation, IOS preliminary proposal (01/19/2016): Is incentive value encoded via mesolimbic dopamine? (PI: Casto, not invited)

National Science Foundation, REU Site (08/2015): Organismal responses to human dominated environments. (PI: R. Gougis, R., Co-PI: R. Bowden, Senior Personnel: Casto. & others; in review).

National Institutes of Health, R15 (10/25/2015): A role for striatal dopamine in encoding incentive value of acoustic social stimuli. (PI: Casto, not invited)

National Science Foundation, REU Site (08/2015): Research in the Anthropocene: preparing the next generation of biologists. (PI: R. Gougis, R., Co-PI: R. Bowden, Senior Personnel: Casto. & others; declined).

National Science Foundation, IOS preliminary proposal (01/16/2015): Function and thermal modulation of yolk steroid metabolism during embryonic development. (PI: Casto, declined).

National Science Foundation, IOS preliminary proposal (01/16/2015): Prioritizing social signals: Is incentive value encoded via mesolimbic dopamine? (PI: Casto, declined).

National Institutes of Health, R15 (06/25/2014): Phasic dopamine signaling in the songbird nucleus accumbens: Influence of internal endocrine state and conspecific vocal signals. (PI: Casto, declined).

National Science Foundation, IOS preliminary proposal (01/17/2014): Function and thermal modulation of yolk steroid metabolism during embryonic development. (PI: Casto, not invited).

National Science Foundation, IOS preliminary proposal (01/17/2014): Prioritizing social signals: Is incentive value encoded via mesolimbic dopamine? (PI: Casto, not invited).

National Institutes of Health, R15 (11/18/2013): Phasic dopamine signaling in the songbird nucleus accumbens: Influence of internal endocrine state and conspecific vocal signals. (PI: Casto, declined).

National Science Foundation, IOS full grant proposal (08/02/2013): Regulation and function of embryonic metabolism of maternally derived yolk steroids in birds. (PI: Casto, declined).

National Science Foundation, IOS preliminary proposal (01/18/2013): Regulation and function of embryonic metabolism of maternally derived yolk steroids in birds. (PI: Casto, invited).

National Science Foundation, IOS full grant proposal (08/02/2012): Do incubation temperature and embryonic yolk steroid metabolism interact to influence trade-offs in developing songbirds? (PI: Casto, declined).

National Science Foundation, IOS preliminary proposal (01/12/2012): Do ectoparasites, incubation temperature and embryonic yolk steroid metabolism interact to influence trade-offs in developing songbirds? (PI: Casto, invited).

Health Resources and Services Administration, Department of Health and Human Services. Interdisciplinary Neuroscience Graduate and Undergraduate Sequences at Illinois State University. 2010 to 2011. \$495,000 (PI: C. Gatto, Senior Personnel: Casto & others, funded D1 DHP 20062).

National Science Foundation. ARI-R2: Animal Facility Modernization. (PI: L.Vogel, Senior Personnel: Casto & others, declined).

National Science Foundation, REU Site: Integrating Field and Laboratory Research on the Evolution of Animal Reproductive Strategies, 2009 (PI: S. Sakaluk, Senior Personnel: Casto & others, declined).

National Institutes of Health, R21: Microsensor development for monitoring dopamine, oxygen and pH during ischemia, 2005 (PI: Casto, declined).

Other Grants:

Whitehall Foundation Inc., Letter of Proposal Intent (01/21/2014): Prioritizing social signals: Is salience coded via dopamine? (PI: Casto, not invited).

Illinois State University, College of Arts and Sciences, Pre-tenure Faculty Initiative Grant (2012) (PI: Casto, funded).

Whitehall Foundation Inc., Letter of Proposal Intent (04/14/2011): Encoding incentive salience of acoustic signals: the role of dopamine. (PI: Casto, not invited).

Illinois State University, College of Arts and Sciences, New Faculty Initiative Grant 2010 (PI: Casto, funded).
Illinois State University, CeMaST Professional Innovation Grant Fall 2009 (PI: Casto, funded).
Society for the Scientific Study of Sexuality, Research Grant 2001 (PI: Casto, funded).
Indiana Academy of Science, Research Grant 2000 (PI: Casto, funded).
Center for the Integrative Study of Animal Behavior, Research Grant 2000 (PI: Casto, funded).

Fellowships, Awards and Honors:

Illinois State University, Office of RSP grant writing mentorship award, Spring 2010
Illinois State University, Research and Sponsored Programs, Grant Writing Initiative Award, 2005
Center for the Integrative Study of Animal Behavior, Travel Award 2003
Society for Behavioral Neuroendocrinology, Second Place Poster Competition 1999
National Science Foundation, Conference Travel Award 1996
Johns Hopkins University, Graduate Fellowship 1991-1996
Boston College, Graduate Fellowship 1990-1991
Villanova University, Graduate Fellowship 1987-1989
Psi Chi Membership (psychology honor society) 1988
Eagle Scout, 1980

Areas of Research Focus

School of Biological Sciences Illinois State University Normal, IL 2009 - present. Head a laboratory studying physiological mechanisms of avian reproduction, maternal effects on offspring development, developmental stress and its influences on phenotypic plasticity, and endocrine modulation of the neural substrates of

vertebrate social behavior. Conduct and publish course-related research with undergraduates studying proximate mechanisms of animal behavior.

Central Illinois Neuroscience Foundation Laboratory at Illinois State University Normal, IL 2003 - 2006. Directed a preclinical research laboratory that investigated the basic neurobiology underlying focal ischemia and experimental stroke in rats. Provided site administration of over a dozen multi-center clinical trials at local hospitals and several single-center clinical trials at local clinics in Bloomington/Normal, IL.

Indiana University, Bloomington, IN 1997 - 2003. Field research and laboratory administrator. Primary research focus: avian endocrine-immune interactions. Other research topics included: the study of brain and behavior in free-living birds, patterns and effects of steroid hormone deposition in avian eggs, the role of plumage coloration in mate choice, and female control of offspring sex ratio.

The Johns Hopkins University, Baltimore, MD 1991- 1997. Hormonal control of sex differences in vocal behavior and associated brain regions of starlings.

Boston College, Chestnut Hill, MA 1990 - 1991. Chemical neuroanatomy and sexual dimorphisms in the vocal control system of song birds.

Villanova University, Villanova, PA 1987 - 1989. The role of prenatal androgen in the sexual differentiation of behavior and the nervous system in rats.

College of the Holy Cross, Worcester, MA 1985 - 1987. Effects of exercise and stress on the reproductive system of female rats.

New England Regional Primate Research Center, Harvard University, Southborough, MA 1983 - 1988. Research support in a BSL-III biocontainment facility at a regional primate research center.

Teaching

School of Biological Sciences, Illinois State University, Normal, IL

BSC 204.01 Biological Investigations (lecture) 2015-2016

BSC 286.01 Animal Behavior (lecture) 2014 - 2015

BSC 327.01 Hormones and Behavior (lecture) 2011 - 2016

BSC 420.04 Graduate seminar in Animal Behavior: Proximate Mechanisms 2009, 2010, 2015

BSC 420.34 Graduate Seminar in Neurobiology: Genes, Brains, and Behavior 2015

BSC 290.01 Research in Biological Sciences (undergraduate research mentor) 2010 - 2015

BSC 420.04 Graduate seminar in Animal Behavior: Biology of Bird Song 2012

BSC 286.01 Animal Behavior (lecture & lab) 2010 - 2012

Office of Research Ethics & Compliance, Illinois State University, Normal, IL

SOTL-IRB Workshop 2008 (presenter)

Sports Medicine 2008 (guest lecturer)

Qualitative Research in Educational Settings 2008 (guest lecturer)

Research Methodology and Statistics in Education I 2007, 2008 (guest lecturer)

Research Design In Education: Issues and Standard Practices 2007, 2008 (guest lecturer)

College of Education, Faculty Orientation, Basics of IRB & Human Subjects Research 2007, 2008

ISU Grant Writing Workshop: Research Compliance for Grant Writers 2007, 2008 (instructor)

Teaching Financial Literacy & Social Justice 2007 (guest lecturer)

University of Virginia's Mountain Lake Biological Station, Pembroke, VA

Parasites and Infectious Diseases in Animal Systems 2000 (guest lecturer)

Department of Biology, Indiana University, Bloomington, IN

Endocrinology 1998 (guest lecturer)

Department of Psychology, Johns Hopkins University, Baltimore, MD

Functional Human Neuroanatomy 1996 (Lab instructor)
Animal Behavior 1995 (Teaching assistant)
Brain, Communication, and Evolution 1994 (Teaching assistant)
Behavioral Endocrinology 1993, 1994 (Teaching assistant)
Psychopharmacology 1992, 1993 (Teaching assistant)
Introductory Psychology 1991, 1992 (Instructor), 1995 (Teaching assistant)

Department of Psychology, Villanova University, Villanova, PA

Physiological Psychology 1988, 1989 (Teaching assistant)
Graduate Physiological Psychology 1988 (Lab Instructor)
Introductory Psychology 1987, 1988 (Teaching assistant)

Marlborough High School, Marlborough, MA

Substitute Public High School Teacher 1985-1986

Supervision of Graduate Students as Major Advisor

School of Biological Sciences, Illinois State University, Normal, IL

Cody Scholtens M.S. (in progress). Endocrine mediated neuromodulation of mesolimbic dopamine responses to acoustic social signals.

Aderinsola Odetunde M.S. (in progress). Ectoparasitism, incubation, and nestling development in song birds.

Amanda Smith. Ph.D. (in progress). Brain mechanisms of female choice for male song in European starlings.

Jason Hanser M.S. (2015). Factors influencing hatching asynchrony in European starlings.

Leah Eisner-Pryor M.S. (2012). Ectoparasites and developmental stress in nestling birds.

Agnieszka Stadnik M.S. (2009). Permanent, focal, cerebral ischemia and early hypothermia: Relation of behavioral deficits to histological and MRI analyses of neurodegeneration at intermediate time horizons.

Sirinun Pongmayteegul Ph.D. (2009). The role of striatal dopamine in transient, focal, cerebral ischemia-induced neurodegeneration.

Donald Osterling M.S. (2006). Tempol as a neuroprotectant in a model of transient focal cerebral ischemia.

Service

Departmental and University Service

Illinois State University, Biological Sciences Scheduling Committee, member, 2015-present

Illinois State University, Biological Sciences Space Committee, member, 2015-present

Illinois State University, Institutional Animal Care & Use Committee, member, 2009-present

Illinois State University, Biological Sciences Seminar Committee, member, 2013-2015

Illinois State University, Phi Sigma, chapter advisor, 2011-2014

Illinois State University, departmental University Research Grant, reviewer, 2009

Illinois State University, Graduate Research Symposium, judge, 2007

Illinois State University, Undergraduate Research Symposium, judge, 2007

Illinois State University, Radiation Safety Committee, member, 2006-2009

Illinois State University, Institutional Biosafety Committee, member, 2006-2009
Illinois State University, Neuroscience and Behavior Seminar Series, coordinator, 2005-2006
Indiana University, Annual Animal Behavior Society meeting, volunteer, 2002
Indiana University, N.S.F. Research Experiences for Undergraduates, mentor 2001
Indiana University, CISAB internal grant proposal, reviewer, 1998, 2000
Indiana University, CISAB Aviary Oversight Committee, member, 1998-2000
Indiana University, Department of Biology, Graduate admissions reviewer and interviewer 1998, 2000
Mountain Lake Biological Station, N.S.F. Research Experiences for Undergraduates, mentor, 1999, 2000
Mountain Lake Biological Station, Liaison to AmeriCorps and the Mt. Lake Wilderness Conservancy, 2000
Johns Hopkins University, Psychology Graduate Program Steering Committee, member, 1991-1997

Professional Service

Judge: Best Student Presentation in the Division of Comparative Endocrinology, Annual SICB meeting (2010 - 2014)

Organizer: Best Student Presentation Judging in the Division of Comparative Endocrinology, Annual SICB meeting (2011 - 2012)

Guest Editor: *Perspectives in Neuroscience*, a quarterly publication for continuing medical education. Spinal manipulation. (Spring 2005)

Committee Member: Neurosurgical Residency Program Admissions Committee, BroMenn Medical Center (2004 - 2007)

Guest Editor: *Perspectives in Neuroscience*, a quarterly publication for continuing medical education. Image-guided robotic radiosurgery: The cyberknife. (Fall 2003)

Chairperson: Central Illinois Neuroscience Foundation Research Committee (2003 - 2008)

Peer Review of Manuscripts for: Acta Ornithologica; American Naturalist; Auk; Behavioral Ecology; Behavioral Ecology and Sociobiology; Behavioural Brain Research; Biological Reviews; Biology Letters; Current Zoology; Evolution; Frontiers in Zoology; Functional Ecology; General and Comparative Endocrinology; Hormones and Behavior; Journal of Animal Ecology; Journal of Avian Biology; Journal of Ethology; Journal of Experimental Biology; Journal of Evolutionary Biology; Journal of Field Ornithology; Neuroscience; Physiology & Behavior; Proceedings of the National Academy of Science, USA; Proceedings of the Royal Society of London B.

Public Outreach

Guest Speaker, Cub Scout Pack 93, Normal, IL, *Biology and Conservation of Birds* 11 Mar. 2014.

Guest Expert, *Uncommon Knowledge*, a public radio program that explains everyday scientific concepts with a light, but rooted-in-science approach.

Snot: 13 Aug. 2007.

Ice Cream Headache: 29 Oct. 2007
